

Technical Amendment (Approved by the Administration for Community Living on 5/8/2026)

TXSILC will organize the process of monitoring, evaluating, and reviewing SPIL progress in collaboration with the network and the public through multiple methods such as:

Developing, distributing and analyzing a questionnaire in collaboration with CILs on SPIL goals.

- Conducting regular, public forums, and public SPIL meetings, and SPIL discussions during Council meetings. These meetings will be used to identify additional data sources (such as research and reports) and to review data to assess progress towards goals and to make decisions on SPIL amendments or future SPIL goals.
- Ensure that the public is informed about progress by utilizing the TXSILC website to post relevant information.
